LOCATION
Meck Digital Services Center (MDSC) will be **strategically located in Bukulu, Kondoa**, a busy and accessible area near schools, government offices, community centers, and town hubs. This prime location is designed to **maximize visibility and customer traffic**, ensuring convenient access for students, job seekers, small business owners, and the general public seeking digital, administrative, and financial services.

OBJECTIVES

- To provide efficient and affordable digital services
- To generate steady daily and monthly income
- To expand into a full digital and ICT service hub
- To expand bank and money service

OBJECTIVES

To provide efficient and affordable digital services
To deliver high-quality, reliable, and timely digital services at affordable prices, ensuring accessibility for a wide range of clients including students, job seekers, small business owners, and the general public. The objective is to simplify access to essential digital services by leveraging modern technology, improving customer experience, and reducing delays and operational inefficiencies.

To generate steady daily and monthly income
To establish a sustainable business model that generates consistent daily and monthly revenue through diversified digital and financial services. This will ensure the long-term viability of the business, enable smooth operational management, cover running costs, and create opportunities for reinvestment and growth.

To expand into a full digital and ICT service hub
To grow the business into a comprehensive digital and ICT service center that offers a wide range of services, including digital skills training, internet services, technical

support, and innovative digital solutions. The long-term goal is to become a leading technology hub in Kondoa and surrounding areas, empowering the community through access to digital tools and knowledge.

To expand bank and money services
To broaden financial service offerings by partnering with banks and mobile network operators to provide reliable and accessible financial solutions such as cash deposits and withdrawals, money transfers, bill payments, and agency banking services. This will enhance financial inclusion within the community while increasing the business's revenue streams.

➢ Optional Add-on (for strong applications like Rootical Level 2):

Long-Term Vision
To become a leading digital and financial service center in Dodoma Region, providing integrated solutions that empower individuals, businesses, and communities through technology

- **Total Estimated Startup Cost: TZS 3,920,000**
- **Optional Improvement (for stronger proposal):**

You can add this line:

Contingency (Unexpected Costs – 10%)
≈ TZS 392,000

Grand Total: ≈ TZS 4,312,000

REVENUE SOURCES

- Online application service fees
- Printing and photocopying charges
- Typing and CV writing services
- Internet browsing services

Revenue Streams:

- **Online Application Service Fees** – charges for assisting clients with government and institutional online applications (NIDA, RITA, TAUSI,TRA, BRELA, TCU, HESLB, etc.).
- **Printing and Photocopying Charges** – fees for high-quality printing, scanning, and photocopying services.
- **Typing and CV Writing Services** – income from typing documents, preparing CVs, cover letters, and other professional documentation.
- **Internet Browsing Services** – charges for providing internet access and browsing support to students, job seekers, and the general public.
- **Bank and Money Services** – fees and commissions from deposits, withdrawals, transfers, and other financial transactions offered at MDSC.

ESTIMATED MONTHLY FINANCIALS
Revenue: TZS 1,400,000
Expenses: TZS 600,000

Estimated Profit: ~ TZS 800,000 per month

ESTIMATED DAILY INCOME

Service Category	Estimated Daily Income (TZS)
Printing, Scanning, Photocopy	20,000
Typing & CV Writing	15,000
Online Applications	20,000
Internet Services	10,000
Electronic Accessories Sales	15,000
Money & Bank Services (commissions)	20,000
Total Daily Revenue	**100,000 TZS**

ESTIMATED DAILY EXPENSES

Expense	Amount (TZS)
Internet bundles	5,000
Electricity	3,000
Supplies (papers, ink, etc.)	7,000
Miscellaneous	5,000
Total Daily Expenses	**20,000 TZS**

NET PROFIT PER DAY

100,000 – 20,000 = 80,000 TZS

MONTHLY PROFIT (30 Days)

80,000 × 30 = 2,400,000 TZS

ANNUAL PROFIT

2,400,000 × 12 = 28,800,000 TZS

REALISTIC SCENARIO (IMPORTANT FOR INVESTORS)

To stay conservative (safe estimate):

- Daily Profit: **40,000 – 60,000 TZS**
- Monthly Profit: **1,200,000 – 1,800,000 TZS**

Banking & Mobile Money Services Float – TZS 2,000,000

This amount represents the initial working capital required to operate financial services within the business. It will be used as a **cash float** to facilitate daily transactions such as deposits, withdrawals, and money transfers.

The float will support services including:

- Mobile money transactions (*M-Pesa, Tigo Pesa, Airtel Money, HaloPesa*)
- Bank agency services (cash deposit and withdrawal)
- Bill payments and financial transfers

Having sufficient float is critical to ensure smooth operations, maintain customer trust, and avoid service interruptions. The amount will be balanced between **cash on hand and electronic balances** across different service providers to meet customer demand at all times.

This component is also expected to generate a significant portion of daily income through **transaction commissions**, making it a key driver of business profitability.

Short Version (if space is limited):

Banking & Mobile Money Float – TZS 2,000,000
Capital set aside to run mobile money and banking services (deposits, withdrawals, transfers), ensuring smooth daily transactions and generating income through commissions.

FLOAT ALLOCATION (TZS 2,000,000)

To ensure smooth and uninterrupted financial services, the float should be properly distributed between **cash and electronic balances (e-float)** across all providers.

Recommended Allocation

Service	Amount (TZS)
M-Pesa Float	600,000
Tigo Pesa Float	400,000
Airtel Money Float	400,000
HaloPesa Float	200,000
Cash (for withdrawals)	400,000
Total	**2,000,000**

Explanation:

- **M-Pesa** receives a higher allocation due to higher customer demand
- **Cash** is essential to handle withdrawal transactions
- Daily **rebalancing** (cash ↔ e-float) is necessary to avoid service interruptions

ESTIMATED DAILY PROFIT

Customer Volume Assumption

Service	Customers/Day	Avg Commission	Total (TZS)
Withdrawals	30	500	15,000

Service	Customers/Day	Avg Commission	Total (TZS)
Deposits	20	300	6,000
Transfers/Bill Payments	15	300	4,500
Total Daily Revenue			**25,500 TZS**

NET PROFIT PER DAY

≈ 20,000 – 30,000 TZS per day
(depending on customer flow and transaction volume)

MONTHLY PROFIT ESTIMATE

(Assuming 26 working days)

25,000 × 26 = 650,000 TZS per month

REALISTIC BUSINESS OUTLOOK

- **Startup phase (Month 1):** ~300,000 – 500,000 TZS/month
- **After 2–3 months:** ~600,000+ TZS/month
- **High-traffic location:** Up to **1,000,000+ TZS/month**

STRATEGIES TO INCREASE PROFIT

✅Increase M-Pesa float (highest demand)
✅Operate longer hours (early morning to late evening)
✅Choose a strategic location (near schools, offices, markets)
✅Offer multiple services in one place (one-stop digital center)

SUMMARY

- **Total Float:** 2,000,000 TZS
- **Daily Profit:** ~20,000 – 30,000 TZS
- **Monthly Profit:** ~500,000 – 800,000+ TZS

WHY THIS BUSINESS IS STRONG

✓ Multiple income streams (digital + financial services)
✓ Daily cash flow business
✓ High demand (government services + mobile money)
✓ Low operating costs

MARKETING STRATEGY

- Promotion through WhatsApp groups and social media
- Use of signboards and banners
- Offering quality and fast services
- Customer referrals and word-of-mouth

MARKETING STRATEGY

Promotion through WhatsApp Groups and Social Media
The business will actively use digital platforms such as WhatsApp groups, Facebook, and other social media channels to promote services, share updates, and engage with potential customers. This approach allows direct communication with the local community at a low cost while increasing visibility and customer reach.

Use of Signboards and Banners
Strategically placed signboards and banners will be used to attract walk-in customers and create strong brand awareness within the local area. Clear and attractive branding will help customers easily identify the business location and understand the services offered.

Offering Quality and Fast Services
The business will focus on delivering high-quality, reliable, and fast services to ensure customer satisfaction. Efficient service delivery will help build trust, encourage repeat customers, and differentiate the business from competitors.

Customer Referrals and Word-of-Mouth
Satisfied customers will be encouraged to refer others through word-of-mouth. This organic marketing strategy is highly effective in local communities and helps build a loyal customer base without significant advertising costs.

Optional Add-on (to make it stronger):

Promotional Offers and Discounts
Occasional discounts and special offers will be introduced to attract new customers and retain existing ones, especially during the early stages of the business.

COMPETITIVE ADVANTAGE

- One-stop digital service center
- Affordable pricing
- Fast and reliable services
- Customer support and guidance

CHALLENGES AND SOLUTIONS

- Internet interruptions → Use backup data bundles
- Power outages → Use UPS or alternative power sources
- Competition → Focus on speed, quality, and customer care

Risks and Mitigation Strategies:

- **Internet Interruptions:** Use backup data bundles or alternative internet providers to ensure uninterrupted service.
- **Power Outages:** Install UPS systems and alternative power sources (such as generators or solar backup) to maintain operations.
- **Competition:** Maintain a competitive edge by focusing on **fast service, high-quality output, and excellent customer care** to attract and retain clients.

FUTURE GROWTH PLAN

- Increase number of computers
- Add training services (basic computer skills)
- Expand into a full ICT and business support center
- Expand Bank and money capital service

GROWTH AND EXPANSION STRATEGY

Increase the Number of Computers

The business plans to gradually increase the number of computers to accommodate more customers and reduce waiting time. This will improve service efficiency, increase daily customer capacity, and ultimately boost revenue generation.

Introduce Training Services (Basic Computer Skills)

The center will introduce affordable training programs focused on basic computer skills such as typing, internet usage, online applications, and document preparation. This will empower youth, students, and job seekers with essential digital skills while creating an additional source of income for the business.

Expand into a Full ICT and Business Support Center

The long-term vision is to transform the business into a comprehensive ICT hub that provides a wide range of services including internet access, technical support, digital solutions, and business support services. This will position the center as a one-stop solution for both individuals and small businesses in the community.

Expand Banking and Mobile Money Capital Services

The business aims to increase its financial service capacity by expanding the float (working capital) for banking and mobile money services. This will enable handling of larger transactions, serve more customers efficiently, and increase income through higher transaction volumes and commissions.

- **Optional Add-on (to strengthen your plan):**

Open Additional Branches in the Future
As the business grows, there is potential to replicate the model in other locations, especially in underserved rural and semi-urban areas.

CONCLUSION
Meck Digital Services Center (MDSC) is a high-demand enterprise with strong potential for generating consistent daily income and achieving sustainable long-term growth. With effective management, customer-oriented services, and continuous innovation, MDSC is poised to become a trusted digital hub and a cornerstone of the community's technological and service needs..
